Compatible with Windows 10, 8, 7, Vista and XP. Safe, easy and no cost. Small file size, fast and easy to use. Read the text file in its encrypted form. Decrypt the text file in one step. Update text file into UTF-8 format Download...Q: Passing null to a LINQ where clause This is the code I have: var userId = "123456789"; var results = (from u in db.tbl_Users where u.UserId == userId select u).ToList(); I have this where clause above because I want to make sure the user I am trying to access isn't null. If I am passing in a null value will it still work? I am thinking it will ignore the where clause and do a straight db.tbl_Users query. A: It will still ignore it and do a straight db.tbl_Users query. You need to check the UserId on your db.tbl_Users, because it can be null in case of a null input. JoyRaj Text File Encryption Program Crack

JoyRaj Text File Encryption Program is a lightweight and easy to handle utility whose main function resides in offering you a simple method of protecting the TXT files you send via online media, for instance, in order to make sure no one, aside from the intended recipient, can read it. Simple and practical looks The application features a clean and intuitive appearance, featuring three main buttons whose role is fairly self-explanatory, namely 'Encrypt', 'Preview' and 'Decrypt'. The small, non-resizable window of JoyRaj Text File Encryption Program allows you thus to choose the component you want to work with at the push of a button. Use the Blowfish algorithm to encrypt your most sensitive TXT files The tool makes use of the Blowfish cipher, providing you with relatively strong protection, to ensure that its decoding can only be done by using the correct key, that was used in the initial process. In order to secure a document, JoyRaj Text File Encryption Program allows you to load it and choose a destination folder. Essential to the process is the key you enter, as this will also be required for decrypting the item. The application only supports TXT format, so if you need to use any other type of file, you will either need to convert it or look for some other software. In terms of output format, the utility exports your file to ENF. If you want to make sure that a recently processed item contains all the information you wanted, you can use the 'Preview' feature and look through it, without decrypting it. Finally, to regain access to the contents of the TXT, you can use the 'Decrypt' component, making sure to use the exact same key, otherwise the process will be unsuccessful. A handy TXT encoder To sum it up, JoyRaj Text File Encryption Program is a useful and effective software solution that aims to assist you in securing your TXT documents against ill-intended individuals, by locking it with a user-defined key and the Blowfish cipher.
