Please run the Configuration Tool and Save" Dec 2, 2006 There is a slight chance that you might need to use this fix to fix this. First off you need to open up the config.cfg file and delete everything (including the title) but leave the code in. Also when you open up Sonic Generations, you need to go to your preferences and try playing it in low graphic mode. In this way, you will find that the game runs in low graphic mode.
