In the Character Options menu, change the draw type to Unique (New Model). Change the Apparel so that you have no Clothing checked (the top option), as I am going to make a whole new layer for future costumes. Up top, change the Body Weight to 70 and make sure you have a Weight of 255 for the future costumes as well. Step 2 - Gray the Pants Make a New Layer, and in Photoshop, press Ctrl+Shift+A, choose the color gray, press Enter to create a new black area, delete the old black rectangle. The "Gray out" button will gray out the black area, and once it's grayed out, double click inside and change the 50% Opacity to everything else. The idea with making the pants gray is that it will look like the white color for pants (we are going to completely change the color for the trousers.) Step 3 - Make the Pants Flannel Make a New Layer, press Enter to create a new black area, and fill it with 50% gray (double click inside and change the 50% Opacity to everything else.)
