In Rage Quest, Zye was trying to escape from the internet, and he set off on his journey to explore the world. Now, the only way he can go back to reality is to amass enough hate to create a portal. In a strange sort of way, I feel like Rage Quest is the spiritual successor to the first Half-Life game. It draws inspiration from the Half-Life universe and adds to it in some really creative ways. The game runs on Unity, so it's cross-platform (Windows, Mac, Linux) and works on low-spec computers. It has been in development for a while, and there will be frequent updates to the game. Today we are releasing the first demo of Rage Quest. We are focused on bug-testing and smoothing out the experience for the first release. There will be a second demo later this year. Both the first demo and the 2nd demo will include a first boss fight, so the second demo will have more challenge. You can find the official website at the link below. You can find the Facebook page at the link below. You can find the Twitter page at the link below. You can find the Discord server at the link below. You can find the Patreon page at the link below. I would like to thank all of you for checking out the game and your feedback. Hello everyone! This is my very first video of the year, I hope you guys enjoy! This video is a very stripped-down version of the game, I'd really recommend playing the full game at this point. If you want to learn more about the game or want to support my channel, please follow my socials or my website: For those of you who have issues, the video format may be the reason. I just recently fixed my issues and found a compatible video format. For anyone else who has issues, I'd recommend using YouTube's new "try my videos" feature because it is extremely reliable. Tech for kasmio : Kotak the casino which brings the best games : Game info : Kasmio is a casual game where you have to launch rockets and destroy bombs. Bombs appear on the playing field in a random place, you can launch rockets that destroy them when they explode, for each destroyed bomb you get 2 points. The difficulty is that launching one rocket costs one point, and they fly to the target for a certain time, so you need to calculate the trajectory to the bombs and try not to miss. If you run out of points, you will immediately lose. You also need to make sure that the number of bombs on the field does not exceed 20, otherwise you will also lose. Use your accuracy. How many points can you earn?Features:- Interesting and simple gameplay- Minimalistic graphics- Nice soundtrack- Using physics In Death's Mark you are the Cadre : the leader of the Cadre group, the Commander : an experienced soldier, and the Soldier : a new recruit. You lead these people in the Operation North Wind in a special forces unit which operates behind enemy lines. It will not be easy: the conflict is a covert one, and you will have to be prepared to face all kinds of possible situations. The enemies are ruthless: you will have to fight against high-tech weapons, and you may even find yourself fighting in high altitudes. The mission is clear: infiltrate in the location and sabotage their military base, but be careful, you are not alone, and you cannot trust anyone. Your task is to take over the enemy base, rescue the hostages and destroy their defences. You have at your disposal a variety of weapons, such as the sniper rifle, automatic assault rifles, shotguns and launchers to blow up walls. The Cadre plays an important part in this situation, and you will be able to control your teammates and give orders. Use your experience to get through these difficult moments, but remember that sometimes your opponents are better prepared. Features:- Intense combat and different gameplay: fight in a realistic and intense atmosphere, using a variety of weapons and items, both on the ground and on the air.- Widescreen support: fully playable in both normal

## What's new:

**OF RAVENS LOSTCAVE OF RAVENS LOSTCAVE OF RAVENS** An Introduction We're at war. Were you aware of this? No? Oh, me to! This here's a pretty big deal ya know. Hitler has transformed the Germans into a fighting force unlike any other. I'm talking about a military force that is smart, mobile, deadly, and nasty! The Germans are the best in the world at fighting and killing. All of Europe has fallen to Hitler's legions. He has conquered much of Europe and expanded his reach into South America (near the United States). He has even captured a large portion of Africa, near U.K. If Hitler is successful here, he will have the largest and strongest army the world has ever seen. Meanwhile we are pitted against just about every country in this world. Russia and Britain stand defiant to the Nazis but the Russians can't do much to help because they are gunless and fighting a huge Civil War. The Russians do have large numbers of soldiers but they are lost in an army crawling with Communist slaves. So, the United States and England have to contend with larger armies ( but poor tactical strategy, according to Winston Churchill). Japan is playing the Great Game. They're a rising power since the World War I and have been willing to engage in any action that will benefit them. They are currently attempting to annex the key island of the South Pacific, New Britain. If they can successfully control the island, they'll be able to control the sea and air routes for ships coming to Australia and food coming in from sea. Oh yeah, and the huge German army you haven't heard of. He's building up his empire like nobody's business. The Germans' main focus right now is across what we know as the Indochine Peninsula. The Greater German Reich is

**spread out like a "V," and one of its "arms" is focused between the Bay of Bengal and Java (Borneo). The problem is the Nazis know that we are not going to sit idly by and let Germany build a world-class, permanent military force. We are already building our own secret army. We have to defend ourselves so we hired some Chinese (our allies) to fight for us. The Abraham Lincoln Volunteer Regiment is a branch of the American Expeditionary Force that has been mobilized to help China defend against the Japanese. We are operating under the pre-war military doctrine.**

New York City FUSER™ is the only network that has your biggest hits. Whether you're all about party music, street beats, or hip hop, this is the place to check out the latest and greatest. But the network's content isn't the only reason to download FUSER™. Members can earn credits for discovering new tracks, delivering playlists, and uploading their own mixes. These credits can be traded for unique mixes, original songs, and other content. Are you ready to get your FUSER™ on? FUSER™ is the network that makes your music. Once downloaded, the game starts you off with a tutorial to show you the basics. But you're not here just for the fun! You'll collect playlists, play them, and check your friends' lists to get to know this music network in style. From the first day, you'll need your own FUSER™ ID to join. After creating your ID, your first tasks are to upload your own mixes and playlists. Your mixes will be compared to similar mixes on the website, and if a similar mix is found, your playlist will be 'in the rounds.' Not only will you need these mixes to earn credits for your profile, but you'll also need to play them on air to earn more credits. In addition to earning credits, uploading your own mixes also gives you access to remixes. Remixes are other users' mixes made by FUSER™ DJs. Each remix comes with a name, username, video link, and most importantly, a link to download the track. DJs can also make their own remixes, but their remixes are only available to their FUSER™ friends. New FUSER™ members can make some great remixes, find some fresh mixes, and earn credits like never before. FUSER™'s New York City Mixer hosts some of the biggest hip hop and electronic artists in the country, so you're sure to find the perfect remix to add to your FUSER™ library and listen to.
