The Werewolves and Vampires are about to start WW3 with the human race. It's up to you to save your people and defeat the impossible forces of the undead. Use your weapons and fight with cunning, strength, and skill, as you try to find your way back home. The Dark World: Edge of Eternity is a survival horror game with a lot of interactive melee combat as well as long range weapon combat. Players will find themselves in a hostile world full of different creatures and missions. It's best to have allies when fighting the darkness. However, the allies can betray you if you fail to help them. Depending on your race, it will take different amounts of time to build relationships and fight alongside other races, so you must plan ahead. In order to survive and do missions, you will have to craft items, farm, fight and use various weapons to defend yourself in a post-apocalyptic world. The game will be set in an open world in Europe. The protagonist will be traveling with a group of different characters that you will choose to form a party with, so that you can explore the world and go on missions. Character Customization: Customize your character. It's best to be a vampire, but if you are not born to be one of the undead, you can also be a werewolf. The werewolf is more powerful, but the vampire is more agile, so you can switch between both in the game. Different character classes will be available to choose from. Depending on your race, you will have different skills, attributes and abilities. Characters will have different gear, weapons and armor which they can use to fight in different environments. If you are able to outsmart enemies with items they do not expect, you will be able to take advantage. There will be a large variety of weapons from fists to bows, and different types of armor to protect your body. Every race will have different gear, weapons and attributes. More information about the game will be available on the website. Overview and Release Date: The game has been in development for the past few months. The basic prototype was playable for the first time in mid-December 2012. It has been out of beta phase since then. There are a lot of new features since then which will be completed before the game is released. The game is expected to be released in early 2013. Development is ongoing. Developer(s): "Discord" It was

Fat Dragon Fat Dragon is a visceral, physics based, puzzle game of hard fast and relentless strategy where you fly and fight to get to the end. The game is divided into four levels, each featuring different gameplay styles: Core, Knife, Gun, and Wish. Face your opponents in each level and try to beat them before your opponent! Gameplay mechanics The game is build on the simple and fun core gameplay pillars of timing and action: Timing is the rule of the game. Give your opponent the best chance to come out on top and allow them to do the most damage. Your attacks must be timed to knock your opponent down with minimal damage. Every attack has a timer that counts down between 0-5. If you time your attacks correctly and knock down your opponent, you'll score points for every 1-3 seconds that you are below their health point: If you time your attack correctly, you will score points if: #1 - If your opponent is below their health, you score X amount of points #2 - If your opponent falls below their health, your next attack will knock them below their health, you score X amount of points #3 - If your opponent is already below their health, you score X amount of points. Your successful attacks that hit your opponent with minimal damage will require you to slow down and be quite to plan ahead. #1 - If you successfully hit an opponent with a spinning attack, your opponent will take some time to get right back up and gain some health. #2 - Your successful spin attack has a slow start, this will allow your opponent to gain health while they slowly getting back to full health. #3 - Your successful spin attack is instant, this will allow your opponent to gain health for long. If your opponent does not have less health than you, you can do whatever you want with impunity! The longer you hold your finger down on the screen, the longer your jump is - with the rules of this game being that you can jump while your opponent is on the ground and your opponent can grab you if you collide with them. #1 - If you jump at them, you will stop. #2 - If your opponent jumps at you, your partner will be super furious! #3 - If your partner collides into your opponent, you will be really pissed off if your partner decides to take the hit. #4 - If you collide into
