After everything needed for Feudal Kingdoms was finished, the team switched to other projects for a while. Fast forward about 3 years and we are happy to present Feudal Kingdoms – Version 1.0. It’s a time for a new adventure. You start the game as the king of a small Kingdom. What do you think of that? Do you still want to use the tactics that you used to conquer your enemies? But now you are starting up as an only ruler. Your objective: to prosper and expand your settlement to new lands. How will you do this? During the game you will have to decide if you want to cooperate with your rivals or simply take over their realms and start ruling by yourself. Do you want to spend money on a big army or focus your attention on diplomacy? Or maybe you want to tear down your enemies and conquer them? You have to decide! But there is a big problem: Your kingdom will shrink every week to a size of about your settlement. Therefore, you will have to manage your resources better than before. This is not easy. The central challenge of Feudal Kingdoms is to decide how much of social and military power you want to allocate to improve your settlement as fast as possible. Or do you prefer a more peace-loving approach? Unite or Die Feudal Kingdoms is based on turn-based strategy. You'll carefully manage your settlements with settlements and troops, and reap the rewards of your work over time. Although you won't conquer your way to the top, you'll be able to watch your kingdom expand from a small settlement into a major empire. You'll also have to make smart decisions to try to shape the game's story to your play style. Do you want to rule by yourself, or do you want to work together with other rulers? Developments Feudal Kingdoms is a sequel to the award-winning Empire Earth and a sequel to Medieval Nations. With Feudal Kingdoms, you'll have a chance to play a similar game with a worldwide scope. The game is still in development but we are happy to share a first gameplay video of version 1.0. As we previously mentioned, the game is still in development. We are releasing a new build every week and are happy to get community feedback so that we can improve the game. In the next 4 weeks we focus on building the tutorial and a first campaign. We also plan to make some small improvements. Before playing, you need

Q: Why does the Gravitational Field Produce a Temporal Correlation and not a Spatial Correlation
If the Higgs Field is used to produce a temporal correlation and not a spatial correlation, why does it work?
In layman terms, what is the difference between just having a correlation rather than having both a correlation and a cause/motion?
In other words, why is it not that with the Higgs Field, it just gives a correlation, rather than having a Higgs Particle cause mass. Does the Higgs field produce a temporal correlation and not a spatial one, and if not what do they mean by Higgs Field producing a temporal correlation and not having a spatial one?
A: I think the example you have in mind is that you want to predict an observable but don't know where to look in order to make the prediction. The Higgs fields imply no such spatial constraints because you only observe the fields instead of everything. BUT it turns out that the field is perturbatively the source of mass, and has a separate Higgs field sourcing the two couplings.

A conceptual image of the new Russian Luzon rocket
A newly-built rocket, capable of lofting crews into orbit, has successfully launched from the same site that crashed in August, Russian space officials say. The new vehicle, known as "LX", has been built inside another rocket to avoid further accidental problems at the Zhukovsky spaceport in north-west Russia. The August 12 disaster left 11 people dead. Last year's disaster resulted from a flawed rocket's engine, which destroyed the vehicle and space module together. There has been no official word as to what caused the 2012 accident. On Wednesday, Russia's space agency Roscosmos announced that the new launch vehicle was checked out and was deemed to be ready for a test flight. c9d1549cdd
