Wikipedia (or its relevant subset); or a significant portion of it (e.g. an article about it). } return queryable.ToList(); } Eu não estou conseguindo pegar o índice porque o campo no BD é INT PK e o objeto de investigação é o LEFT JOIN ao contrário. Alguém pode me ajudar com a lógica e o código de como implementar isso? A: Resolvi implementar o método da seguinte forma. public List listar(int codigo) { string query = "SELECT * FROM partes WHERE codigo=@codigo"; var queryable = _dbContext.Database.SqlQuery(query, new object[] { codigo }); var transportes = new List(); foreach (var item in queryable) { var transporte = new TransporteNovo(); transporte.id = Convert.ToInt32(item.codigo); transporte.partes = item.partes; transportes.Add(transporte); } return transportes.ToList(); } Por algum motivo ao fazer o JOIN em função da variável "codigo" eu não estava conseguindo pegar o Id do item.

So when my sister announced that she was doing this movie (something to do with classic cars)I saw it without hesitation. It is a classic in the great prints. The greyhounds in this were really wonderful and kept up with the challenging regiments. The plot was all that I expected. Very good movie. When I was a kid of 8 or 9, my family was going through some very difficult times, with our mother being sick, and having a broken leg to boot. I used to love watching movies. My dad would pick up great movies that would let me escape from my traumatic world of mother being ill, and afterwards, I would tell my mother about them. I used to love to "read" the book before I saw the movie, because I was just impressed with the story and wanting to know what happens. I have never been disappointed. Dad and I
