+ The game has a mostly casual feel. You can choose the difficulty as well as play it on easy, normal, hard, and super hard. + A kind of overworld map is always available, no matter where you are (or what order you go through the 6 dungeons). You can navigate the map very easily and find all the towns. + In the overworld there is a large map that you can zoom in and out on. The overworld (and dungeons) can be explored in any order. + There are many town locations. Many have shops you can enter. + Many (most?) towns have a light orb which can be found using the menu, or at any shop. + Each town has at least one location with a light orb, however there are some towns with more. + Once you enter a dungeon, even if you chose not to at the start, you can still go through the dungeon in any order. + Dungeons are pretty self-explanatory. Most have a main path you need to take, and some have optional side dungeons (like jumping puzzles or fey). These do not have a light orb and can only be accessed by going outside the main path. + You can collect 40 different weapons, with a variety of special effects. + Completing dungeons can open up the chance of getting special items, alchemy ingredients, and so on. + You can use alchemy to create powerful potions and armor. + Once you collect enough alchemy ingredients you can use them to create powerful weapons and armor. + Mobs have different behaviors, such as aggressive, defensive, and curious. + You can also collect a variety of alchemy ingredients. + Each weapon, armor, and potion has a stat. + You can go into town to train a certain stat, such as strength. + The higher a stat, the stronger the effect and the better for your future encounters. + Some weapons can be upgraded. The best upgrades are rare, expensive, and found in a unique shop. + Loot can include armor pieces, weapons, alchemy components, and potions. + All the items you find can be equipped, and you can change the accessories at any time. + Unlike other games you may have played before, you never lose your progress. If you die, you can reload the save file and continue. + You can progress without killing any mobs. + You can save at any save point during

After some time, I've come up with the solution below. Can someone please tell me if this is a secure and well-enoughed method of doing this? var buffer = new Buffer(msg); var crypto = require("crypto"); var encrypted = crypto.createCipher("blowfish", '616e29d31c91684d8f7479eeb4f4d356'); encrypted.update(buffer, "binary", "binary"); encrypted.final(); var decrypted = crypto.createDecipher("blowfish", '636e29d31c91684d8f7479eeb4f4d356'); decrypted.update(encrypted, "binary", "binary"); var msgWithoutEncoding = decrypted.final(); function trim(s) { return s.replace(/^\s\s*/, "").replace(/\s\s*\$/, ""); } var msg = msgWithoutEncoding.trim(); console.log("Original:" + msg); console.log("Encrypted:" + trim(encrypted.final().toString("hex"))); console.log("Decrypted:" + trim(decrypted.final().toString("hex"))); A: There is nothing secure about this. Even using Blowfish is not going to offer much security, because an attacker can see if a passphrase is correct and take a guess at a more or less likely passphrase by seeing the effects of another passphrase.
