Shiny Sun is a side-scrolling action puzzle platformer, about a young boy trying to save his napping sister from a corrupt solar system. You play as the Sun, and must guide him through levels, collecting shiny objects to free his sister. Each level is a one-way travel adventure, but the Sun must always start from the beginning. It's up to you to find all the objects and solve all the puzzles and level. This is a playable game, but it is also a living simulation. You can explore the environment, collect things and meet new friends. This is a digital art game. There's no real world behind it. The only thing you can interact with is your environment. You can also speak to the characters. It is very similar to artgames and interactive fiction. Many people use it as a way to interact with their art. The original plan was for Shiny Sun to be just a single player experience, but it started out as an editor, and the project has grown into a community. There are currently 2 gameplay modes: single player and coop/multiplayer. The coop mode adds teamplay into the action, and the multi-player mode allows the player to choose 4 bots to play with them in 3 different game types. There is also a creative mode where you can make your own levels using the editor. I hope to make an overhaul to the editor after this game is done, so people can create their own levels too. More free art games coming soon. FEATURES: 1.5hours gameplay Side-scrolling action puzzle platformer Multiple paths in each level Shiny objects that give you abilities Kameo mode for collectible text Kameo editor New beautiful dreamlike art for Shiny Sun Coop and multi-player Make your own levels using the editor Shiny Sun has now been entered into 3 competitions: Kameo 'Monochrome' Competition, prizes: First prize - 1.000€, 2nd place - 750€, 3rd place - 500€ ArtStation 'Sunshine' Competition, prizes: First prize - 1.000€, 2nd place - 750€, 3rd place - 500€ International Game Festival 'Sunshine' Competition, prizes: First prize - 1.000€ White Paper Check out our upcoming game About This Game: Shiny Sun is a c9d1549cdd

What's new in Voxelgram:

(video game) Metal Heroes is a 1992 adventure game for the GameBoy handheld video game console, developed by Superior Quality Software and published by GT Interactive. It is an action-adventure game based on the Metal Heroes manga and anime series. It was released in North America in 1992. The game was ported to the Sega Game Gear by GT Interactive in 1993. Metal Heroes is the first game for the Game Boy, predating Square's Final Fight and Capcom's Mega Man for the Game Boy. Release The game was to be published in North America by GT Interactive. However, after Universal Interactive Corporation acquired GT Interactive in 1992, the company was forced to sell the Metal Heroes license to a new company, GT Interactive. GT Interactive's version was eventually delayed and retitled Metal Heroes: Return of the Weapons in 1993. The game was released on a PAL cartridge. Development Metal Heroes is based on the two Metal Heroes manga and anime series. In the game, the player takes on the role of the leader of the Metal Heroes. This becomes evident when Robocar and Manipulator are never used. The PC-800 version of the game, released by GT Interactive, includes an arcade mode that simulates Robocar and Manipulator. The players has to stop enemies that are armed with electric and electric-magnetic force weapons. For each player defeated, Robocar and Manipulator hurl projectile weapons. Gameplay Metal Heroes can be played in two ways: on the PC-800, which imitates the Metal Heroes arcade mode, or in single-player or two-player action mode. All characters except Metal Armor Jean had no changes compared to the manga and anime versions of the Metal Heroes. Metal Armor Jean was changed from a purple-and-black-colored suit to a blue one. Metal King has the same change in color scheme. The game also changes the instruments Robocar and Manipulator play. The robot vehicles' instruments were changed to more conventional ones. Robocar and Manipulator play electronic instruments. When the game starts with Metal Heroes, the

player assumes control over the robot. Unlike the anime series, Robocar can run at a maximum speed of and Manipulator can run at. The game's maximum difficulty is level 8, wherein the player is required to defeat the Metal Heroes' commander Morju. There are a total of seven levels, wherein each time the player completes one level, the game will continue with another. When the game reaches

This game was released on Steam on October 17, 2017. Players choose between Coco and Brownie as they go on their first ever cat-and-dog school day, with Patches as their teacher! As Patches hauls a bag of poop and kibble up the road to school, you will be playing the role of Olive, Angel, Sparky and Ginger. Each of the four characters has their own unique set of skills that are used to deal with each situation. They all have to navigate their way through this school day with Patches, while making sure they don't get in each other's way. With Patches' help, the four kids navigate the halls of school and discover the many (and weird) ways they can kill each other. Will they succeed in making this their Apawcalypse day? If they don't, it will be a Purrfect Apawcalypse! Key features: A cat-and-dog school day as you play through a hilarious and tragic cat-and-dog apocalypse scenario. 4 brave kids with unique skills as they navigate the world of the dead. Not your typical story. Themes of war, sex, religion and other such nasty subjects will keep you on your toes! Face your worst nightmares and you may still survive! Welcome to the Purrfect Apawcalypse! For your convenience, this game comes with six distinct endings. You can also choose to decide how many kids Patches kills. The game also features four main environments that will change depending on your choices! Gameplay Choose your characters and interact with the world around you. Take on all the characters with their own unique abilities. Avoid the dogfights and gore to clear the school. Get out alive! Play in 3D and 2D mode as you are transported through time. 6 different endings to reach Duration and Gameplay A dark comedic interactive story starring 4 adorable puppies and 2 timid cats. Discord chock full of crude pictures and content. Multiple endings depending on the choices you make! 6 individual ending chapters.
