I am using Windows 7. A: Java home: echo %JAVA\_HOME% C:\Oracle\Java\jre7 Java version java -version C:\Program Files\Java\jdk1.7.0\_07\bin\java.exe A: Open command prompt window and in it type where java.exe A: type where java.exe 1. Field of the Invention This invention relates to a control system for a power steering system in an automobile vehicle. 2. Description of the Related Art Conventionally, a power steering system for controlling the degree of supplying a steering assist force to a steering wheel in accordance with the steering torque applied to a steering wheel has been used in an automobile vehicle to reduce the burden on the driver who operates a steering wheel. A power steering system of the electric type is known in the art. In this electric power steering system, a target steering torque value stored in a microprocessor is compared with a steering torque detected by a steering torque sensor. When the comparison result indicates that the steering torque detected by the steering torque sensor is larger than the target steering torque value, a motor is driven by a motor drive circuit in accordance with a motor drive control signal stored in a microprocessor, to apply a steering assist force to the steering wheel. However, in this electric power steering
