Here is what I'm trying to do: I have a tag inside of another tag. text (Should look like this) text text text Using just CSS, how do I make all span elements inside of the span tag that has the text "text" appear? (Should make all span elements inside look like this) text text text This would be easy to do in jQuery with some for loop, but I was wondering if it is possible to do it with CSS. A: .span:first-of-type.span:not(:first-of-type) { display: none; } Fiddle A young Russian man who got hold of computer passwords and access to others' information has been fined US\$100 by a court after he had violated some data protection laws. The Russian regulator's decision to prosecute Dmitry Manikov was prompted by his own complaint, after he discovered that his information had been viewed by his peers and that his personal data was d0c515b9f4

Better Service. Self-service kiosks are designed to accelerate ticketing and reduce the time a customer takes to experience a.State of the early universe, and the end of the cosmic microwave background radiation (CMB) is a milestone in the early history of the universe and in cosmology in general. Although the direct consequences of the measurement are modest, the epoch in cosmic history is sealed from observations, and for the first time a full picture of the history and physics of the universe energes. There are six specific predictions of the standard model of cosmology that should be verifiable by future observations:1) the mean density of the universe is very close to the critical density,2) the universe is spatially flat,6) the universe contains between 2% and 10% baryons.Q: Right tool for updating session/cookie values I have a website, which has to compare a value at the start of the session with a value at the end. I need to be able to say if the value has changed. I wrote up a quick prototype and I
