The EOS ecosystem is built upon three pillars: the EOS blockchain, an EOSio smart contracts platform, and EOSDAC (EOS Direct Accounts Contracts), a decentralized app development platform that allows developers to build their own decentralized applications (dapps). EOS, a decentralized, block-chain-based Operating System for building smart contracts and dapps, is committed to powering the next generation of blockchain applications. The EOSIO Software Development Kit (SDK) enables the creation of EOS dapps. EOSDAC accelerates the development and deployment of dapps. EOS developer community is being

powered by the world's #1 developer platform for powering blockchain dapps. 'Blockchain is the next big technology revolution. EOS is leading the blockchain revolution for new realworld businesses like decentralized autonomous vehicles (dapps), smart contracts, digital title exchanges, and other emerging uses,' said Dan Larimer, Block.one Co-founder. 'EOS is the world's best use case for blockchain.' "We're always looking at new opportunities to create tools that help developers everywhere unleash the potential of blockchain technology on the world," said Ben Cheng, co-founder
