One of the most mysterious objects in Finnish folklore, Leväluhta spring is located on the bottom of the lake Ojankuunjärvi, in the Finnish Forest District of the middle-sized town of Orismäki. It is a place that is filled with stories of murder, cannibalism and ghosts. Many of them say that this is the holy grounds of the Finnish witches. Many centuries ago, the holy grounds was used as a holy place for witches in a grim ritual. The table, branches and flowers were chosen for fertility and blessing, and the witches would sacrifice a virgin to the ground. This kind of thing was not tolerated in the Protestant, Catholic and Orthodox Christian societies. In 1674, reverend of Isokyrö, Israel Ulftanus wrote that human bones have risen up from Leväluhta spring throughout the ages. Inspired by the book "Leväluhta" by Marko Hautala, the story revolves around an ancient burial site in Orismala, a struggling eldercare nurse, and a lonely old woman. Beautifully photographed 2D graphics inspired by movies like The Lighthouse, Night of the hunter, and Persona. With gameplay-driven storytelling and slow-paced claustrophobic dread, Leväluhta is a unique horror experience like no other. Mature Horror Noir horror set in real-world Finnish locations, no jumpscares or splatter. Unusual Gameplay Classic adventure game mechanics but fully modernised with a heavy emphasis on movement and strategy. Play as a eldercare nurse without the resources for her job - to take care of an old patient and her house. Vacuum, make food, clean, fix, and so forth, based on job descriptions. Race against the clock, manage your stress levels, and fight against randomised daily complications. Player-Driven Investigation Taking a twist to the horror mansion trope, your patient has a small house with unexplained hidden layers. Uncover its secrets at your own pace, with your own smarts. Focus on Replayability One-time branching dialogues & small special randomised events that don't show up on each playthrough. Instead of vast content, Leväluhta focuses on small, meaningful, curated details.[Validation of the WHO diagnostic criteria for systemic lupus erythematosus]. What's new in Slayaway Camp:

, brought to you by Cubed3, is a FUSION of Action-RPG style combat with RPG adventuring, inspired by the likes of the classic Dungeon Keeper games by Bullfrog and the Baldurs Gate series and expansions. The game is a new take on the genre and as such it's a mix of the best of old and new! The campaign is primarily set in Dunem Village, the starting town of the game, on the Continental mainland. On your way you'll encounter a number of dungeons to explore and conquer, however Dunem Kingdom is the original game so that is where most of the main quests, and much of the game in general, will lead you. Dunem Kingdom: Sign of the Moon is in development and can be pre-ordered via itch.io for \$9.99 on PC and the PlayStation Store for \$13.99. I reviewed the game for \$20 on PC as it's around that price in the US. It will release on Xbox and Switch platforms in the future and there is no release date at this time. To learn more about Dungeon Kingdom check out the official site:

www.DungeonKingdomGame.com and follow them on twitter (@DungeonKTHX). Why I Am Reviewing I really enjoyed Dungeon Keeper recently, as it represented a return to the old school of RPG combat and strategy games. I am looking forward to the chance to return to Dunem Kingdom to see what the game has to offer and I also wanted to experience a new genre by giving Dungeon Kingdom: Sign of the Moon a try. How it Works Dungeon Kingdom is a well polished looking game and while the game has a lengthy campaign, it is very easy to jump in and out of different dungeons and parts of the campaign as you choose. To get into the basic dungeon creation process, you can open up a map and drag and drop each room onto the one you wish. Your map cannot

have too many rooms at once so the game will tell you which one to keep. You need to allocate each room a level and you also need to make sure you select what materials you need to complete a dungeon too. The various materials required for every dungeon are noted on your status screen when you begin. You need to gather them and make certain that they're all allocated before you attempt the first dungeon. Once you start, you can select which materials you'd like
