YOU SHOULD BUY THIS GAME! I'm a huge fan of fantasy games with a beautiful art style and amazing music. Besides, this is the first fighter game I've played in the iPhone/iPad.

iOS, iPhone & iPad, Arcade, Freeware, Casual, Fighting, RPG, RPG Maker, PS2, Strategy, Turn-Based Elden Ring is a casual puzzle game. Enter the land between and duel against enemies using the Elden Ring, a magic sword which allows you to create your perfect weapon. Enjoy watching creatures fighting between themselves and then fight them all in turn-based combat. Go to the Elden Ring and return home with a

bounty of experience points and ready-to-play characters. Get to the world of the Elden Ring! There are four epochs which you should reach when you delve into the world of Elden Ring. When you reach your goal you will find the peace and tranquility of the Lands Between. Explore a vast world full of excitement! A vast world where open fields with a variety of situations and huge dungeons with complex and three-dimensional designs are seamlessly connected. As you explore, the joy of discovering unknown and overwhelming threats await you, leading to a high sense of accomplishment. Create your own character! In addition to customizing the appearance of your character, you can freely combine the weapons, armor, and magic that you equip. You can develop your character according to your play style, such as increasing your muscle strength to become a strong warrior, or mastering magic. An epic drama born from a myth! A

▼ Why We're developing a new fantasy game. As a genre of games, VR games have been repeatedly released, and how they develop and what they produce has changed drastically every year. In many cases, even the creators of VR games are doing the same thing over and over again, and it's difficult for fans to find something that's new. On the other hand, technology advances every year and the mobile gaming industry recently has exploded, and as such VR games need to evolve as well. Even if it's a VR game, you will use a VR headset, so there is no choice other than to make it playable in VR for the sake of optimal immersion, and it's necessary to consider that from the very beginning. It is thus essential to have a strong concept and a unique take on the VR game in order to create something new in the genre. The development of an action RPG is an ideal choice as an action RPG that is playable in VR. The genre action RPG genre is a game genre where you start with a special weapon, defeating various creatures, and through the use of skill and a little bit of luck, you can become a hero in order to save the world. A game like this would be loved even if it's done in a regular 2D format, but a VR game will make the world and the gameplay space larger, and provide you with the sense of presence that VR games offer. Our goal is to create the most enjoyable action RPG that is playable in VR. ▼ What is the Why Games? Campus special team. The Why Games! Campus team consists of developers who are also passionate about games. There are 10 of us who worked at the company for more than 5 years, and we all have the game development experience gained from working at other companies. The members are also very attentive to the customers, and we are glad to say

that we've delivered many quality games to our customers. ▼ Why We're Developing a New Fantasy Action RPG We are currently developing a new fantasy action RPG that will be playable in VR. You won't feel any dizziness when you play it, and you will be able to freely move and interact with the world. We want to make a VR game where everyone can play and enjoy playing it together with their friends, and we are developing a game with that purpose in mind.

ava- NonStrictRefConException from Activator I know that StrictRefConException is used when we try to cast a object after g it as null. But while using Activator.getActiTor(Class y) it throws StrictRefConException. Why? How to handle this exception? Class x = vator.getActiTor("Hello"); Class y = x.getClass(); // trying to cast x

ject) x).getClass(); // trying to cast y ((Object) y).getClass();
StrictRefConException re = new NonStrictRefConException();
