* Adobe PhotoShop CS2 is the latest version of the Photoshop software package for image editing. * You can find more on Photoshop here: [`www.adobe.com/products/photoshop.html`](http://www.adobe.com/products/photoshop.html). A softbody (a.k.a. fluid modeling) plugin allows you to paint freehand within a 3D mesh and then use the resulting mesh to change the other properties (such as texture) on the object. It was launched with the release of Photoshop CS4. * If you want to brush an image, you can use [`www.adobe.com/products/illustrator.html`](http://www.adobe.com/products/illustrator.html). A video editor allows you to be creative with a video while you edit it and composes video out of still images. You can also extract frames from a video and move, rotate, and scale them in other compositions. * Adobe Premiere Pro CS4, shown in Figure 6-3, is made by Adobe Systems. * If you want to learn more about the video editing software, check out the Adobe Premiere Elements guide here: [`www.adobe.com/products/elements.html`](http://www.adobe.com/products/elements.html). A digital video editor is a software package that specializes in the recording and editing of digital video. The outputs produced by these packages differ widely from one another. * Digital video editors generally output video files in AVI, MP4, or other container formats. * For more on digital video editing, refer to the DVD authoring software guide at [`www.dvd-software.com/video`](http://www.dvd-software.com/video). Figure 6-3: Begin with this software tool for digital video editing before you move on to the next chapter. ## Enhancing the Photos You Capture You can use Photoshop to enhance the overall look of any photo, no matter where it's stored. You can then use other Photoshop tools to apply that look to the multiple other photos you've created. It's important to note that you can apply the same edits to all the photos in one shot using the Clone Stamp and Quick Selection tools. This way you can quickly change the look of a whole series of photos without having to start over each time.

Q: Forward com port to COM5 and COM6 I am working on a mobile device with two eSata ports and using the hciconfig tool I can see both ports COM5 and COM6. The problem is when I try to forward them, the device is showing that there are errors when trying to open the ports. When I type in the command line sudo hciconfig -F com5 it shows Error: Could not obtain the interface flags from the device The second problem is when I type in the command line sudo hciconfig -F com6 it shows Error: Not a valid PID file. I am not sure if I am doing something wrong with the ports or if it is any software I am missing. A: This might help: Right click on your start button then all programs. And then click on run. The application is called "task manager". Then click on processes. You will find the PID number for your command line. You will now have to kill all the process with that PID before you run your command line.
