I am making a form in which the user can add cities he travels to. I want to make sure that the user has at least one other city in his database (to prevent from filling a field with a city just in case) What is the easiest way to do this? My problem is, I obviously don't know which fields in my database (I'm working with a SQL Server database) correspond to each question of the form and which one should be linked to which field on the user input. Thank you A: You can just run a query to select that value. If no rows are returned there are not any user-entered cities, and if one value is found, it means that user has at least one city at that value. if (exists(SELECT \* FROM TheTable WHERE City Like '%'+ @Search + '%')) if you only have one table with foreign keys to City then you could use a MERGE statement as follows: merge into City using T

Created by Evolution: Technology E: Evolution.Hacking@gmail.com 20/09/2017 Created By: RISSEL W Hope to see you in the contest. If you are interested in my other games you can see them here: (and watch my youtube) About The Game: This game is inspired by the game "Hacker!" in which you run from side to side, collecting coins and avoiding obstacles, which can be harmful to you. This game is based on a contest in which there are 10 maps that you need to beat. The game is being created for PC and Mac. The idea is to get to the exit from the top of the platform when you fall from the platform. Everything you collect will be saved when you get off, this is used later in the level. We had in mind to give it a unique feeling and control. Every time you start a new level, you will have a score depending on what you have done in previous levels. To beat this goal, you need to collect as many coins as possible. All levels are based on real locations from which you can choose. You can also see these locations in our demos, there will be at least two demos per level. The Game is currently in progress of the project. But, it is open for anyone who wants to contribute. We have also decided to make a batch of levels for Android and iOS in order to improve and contribute to our work. While developing the game we will also fix bugs, give us feedback on your suggestions, etc. NOTE: Please install this from game directory: Engine/Extras/Redis/en-us/UE4PrereqSetup\_x86.exe About This Game: Created by Evolution: Technology E: Evolution.Hacking@gmail.com 20/09/2017 Created By: RISSEL W Hope to see you in the contest. After all, "I think it is better to have a small buttercup in your hand than a bunch of oak leaves." What I was told about the former is, "You are always cold and sleepy with a hundred people around you." I do like to have a hundred or so people around me, and I like to be able to count on them, but why be cold and sleepy? That is not what I long for. The following was given to me some time ago, and I think it is true. Where I Lived "It is not the mountains that are beautiful, nor the valleys, it's the people who lived there." -Meistersinger von Nimmersoleje The Purpose of Education To provide you with some idea as to what education is. For you have probably attended many educational institutions at some time in your life. Some of you have been to colleges and universities, and received your B.A.s and your Masters, and perhaps you have attended some commercial schools. So you are probably familiar with the sort of education you receive at such institutions, and at such institutions it is common to receive large fees. I believe that there are educational institutions in the world that can provide you with service more valuable than any that you are receiving at present. These institutions are composed of people who take the very simplest and best elements of education and, removing the fat and the superfluous, and adding to it the correct and needed ingredients, so that you can live your life with your greatest happiness. Let me explain just what education is, not for you, but for them. Education is a process through which you receive service, and it is comprised of one of two things: Knowledge The correct use of that knowledge. I do not want to put a wrong interpretation on the matter, but it is my experience that many of you do not understand what they are receiving through your education. I do know that there are some

I have just released my second game, Maze Imaze. This game is much more easy to play. It's a small and very simple game with beautiful graphics, music and sound effects. You start with the maze in the middle of the screen. And to found the way from maze you must complete the maze and there is a question of challenge. You can skip the maze and answer with the option in the title bar. There is also a game in progress in levels with different difficulty. If you stuck - you can try a new level. --- UPDATE 9/2013 --- After you find the way from the maze you can also return to the beginning of the level to try another way. --- UPDATE 11/2013 --- Added 3 new levels and 2 new levels in progress. Droid Ransom 2 is a challenging tactical game with the element of puzzle-solving. In this game you get a new set of characters and have the task to stop the criminal Koula from stealing from the galactic empire. The best way to do this is by locating and rescuing nine captured noble robo-droid defenders. This game has a nice storyline, but the mission (cleaning the army base) seems to be very simple and the game is not very difficult, just impossible to beat. Avoid critical hits with your droid, because they will make a destruction of your character. Use weapons that reduce the damage of enemy's attacks. Characters also come with a special attack which helps you to find the way in difficult sections of the game.
