Revista Nova Escola 41 Grandes Pensadores Pdf DownloadQ: How to have 3 entry user values in one input box that is supposed to take the user's values I have to create a form with a username, password and 3 checkbox that if unchecked, it won't accept the user and it will be blank, if checked, it will say accepted. I am kind of stuck on this part. Can I somehow have 3 entry users in the same input box or the easiest way is to create 3 different input boxes? A: Consider the following

```
import tkinter as tk
root = tk.Tk()
cc = []
def check():
    x = tk.Entry(root, bd = 3)
    x.pack()
    x.focus_set()
    x.config(state='readonly')
    x.config(text='')
    print(x.get())
    if x.get() != '':
        cc.append('accepted')
    else:
        cc.append('rejected')
    return x.get()
tk.Button(root, text = "Check/uncheck boxes", command = check).pack
```
