Autodesk AutoCAD Developed in the late 1980s, AutoCAD marked a new age for the development of CAD. Autodesk was the first company to release a CAD application for the personal computer, making it the first CAD company with a viable business model, and setting the course for future releases of CAD applications for the PC. To date, the company has released over 100 applications for its AutoCAD and AutoCAD LT suite, which has sold more than 100 million copies worldwide. Following on the heels of AutoCAD, the company's first product for the Mac, AutoCAD LT for Mac, was introduced in 1992. The first release of AutoCAD LT for the Mac was an 80-column app running on the PowerPC processor, with later releases being written in PowerPC native code and running on Mac OS X and later OSes. AutoCAD LT for the Mac is the successor to the earlier Multimedia Environment for AutoCAD (MEAC), developed by Primis Industries, which ran on Apple II, Mac, and Windows platforms. In 2015, the Autodesk Autocad LT for the Mac app was replaced with the AutoCAD LT for Mac app, which runs on Intel and PowerPC platforms. AutoCAD Modeler was introduced in 1990, and the first release of AutoCAD Modeler, AutoCAD Modeler 1.0, was for MS-DOS and the PC DOS operating systems. Today the majority of AutoCAD Modeler releases are for Microsoft Windows, with most releases for Linux operating systems being non-updates to previous releases. In addition to AutoCAD and AutoCAD LT for the desktop, Autodesk also has AutoCAD for Mobile for Apple iOS and Android devices. As a native iOS app, it is available in the App Store, while Autodesk's Android app is available through the Google Play Store. AutoCAD LT for Mobile for Apple iOS and Android devices is available as a native app on iPad, iPhone, and Android tablets. History Autodesk started its development of AutoCAD in 1982. On December 18, 1982, the first release, known as AutoCAD for the X12 Architecture, was published. The first release of AutoCAD was for the Apple II, running on a Motorola 68000-based system. The 68000 processor had a 16-bit memory address bus and 16-bit data bus.
