## What's New in the?

New AutoCAD 2018-style license badge. New AutoCAD 2020-style license badge. Extensions: New features for the experience-based Autodesk Exchange Labs. This section of the product contains the labs, features, and related documentation. Extensions: Support for new cloud-based productivity services, such as Autodesk 360 Viewer, enabling you to create and view 360-degree images, videos, and other files in AutoCAD, and keep them up to date with new versions of those files. See the related video: 1:19 min. Extensions: New custom line-style properties, for use with the Line Style option on the Draw menu. See the related video: 1:33 min. Extensions: Marker Guides: New tools for placing markers and reference lines. Use the Line Style option on the Draw menu to place markers at a specified point or use the Marker toolbar. AutoCAD automatically creates a reference line to link the marker to the location. These new tools are not available to non-designers, or in the Draw, Annotation, or Annotate menus. Extensions: OpenSCAD: New OpenSCAD component libraries that enable you to import and manipulate CAD file formats more easily. See the related video: 1:10 min. Extensions: Snapping: Re-engineered snapping behavior. Extensions: New Vector Snapping features for multiline and multiconnected polylines: Use the Vertex Snapping options on the Snapping toolbar or choose the Multiline or Multiconnected tools. You can toggle between two versions of the snapping options for Multiline and Multiconnected polylines to customize your snap behavior. See the related video: 1:07 min. Extensions: Snapping: Extended and enhanced snapping behavior for the Vector Editor: The Vertex Snapping tool now has an option to align object shapes to their local axis, so you can use snapped vertices to locate shape center points, align corners, or perform other shape-specific actions. (video: 1:04 min.) The Vertex Snapping tool is located on the Snapping toolbar. Extensions: Auto CAD Cloud: Changes to the licensing model for AutoCAD Cloud.

## System Requirements:

System requirements are subject to change. Please follow the link above for our most up to date system requirements. Important: Windows 7 is no longer supported and will not be upgraded to Windows 10. How to use this guide: This guide is very long and detailed. The one goal we want to achieve is to offer you a system that will run as clean as possible. You will be surprised how many games that are outdated and more or less unplayable can be fixed with our guidelines. We don't want to break compatibility but we do want to
