What's New in the?

A new feature called Markup Assist is now available to CAD designers. Markup Assist uses a connected system to analyze CAD drawings to extract information, create links to existing objects, and suggest edits to your design to improve its overall accuracy. With Markup Assist, you can send the CAD design to your printer or publish it to the Web as a PDF or DWG file while it's still in Markup Assist. New Connected Layouts: Get fast, accurate feedback on your layouts in real time. Use the connected layout tool or style guide with newly added Reference Points. Add Reference Points and endpoints to design blocks, lines, circles, and rectangles to give your geometry more consistency and accuracy. New thickness- and weight-related attributes are automatically incorporated into your drawings. (video: 0:48 min.) An expanded array of content libraries in the Content Browser and Content Navigator. New libraries include a Watermark; a Catalog; a City; and a Landscape

(available only in Civil 3D and Architecture & Interiors 3D). Get new, smarter points to help you find what you're looking for. Points now use geometrical constraints in addition to being connected to the object or tag they represent. Design your point and adjust its settings in the Point Options dialog box. New options and constraints are available, including:

- How to work with new 3D space
- To get the most out of the new 3D space features, follow these 3D space tips:
- 3D space is available only for CAD/CAM applications.
- 3D space dimensions aren't constrained within the blocks, and can't be combined with existing constraints.
- Create a 3D space in a drawing block as an independent dimension.
- Convert 3D space to other types of dimensions
- Use the 3D space dimension type and dimension lock to control which object it references. (See the section on 3D space dimensions in the Dimension Type Table in the Drawing Reference Guide for more information.)
- Use the 3D space dimension type to lock it to an existing drawing object. (See the section on 3D space dimensions in the Dimension Type Table in the Drawing Reference Guide for more information.)
- Use the 3D space dimension type to lock it to an existing layer in a drawing project. (See the section on 3D space dimensions in the Dimension Type Table in the Drawing Reference Guide for more information.)
