reader .Q: How to print
the output of a sql query
without displaying it on a
browser? I need to make
a quick web app and I
only need to display a
select statement's output.

I don't want to display the select statement on a browser since it's very lengthy so I don't want it to appear to anyone. Is there an option to accomplish this? A: You could make it an iframe. Or you could have a javascript that outputs the string, so it doesn't load the page. The world of sexual violence in Hollywood is getting a lot more attention now than it did 30 years ago. Wonder Woman star Gal

Gadot has been campaigning hard to ensure sexual harassment in the film industry and her message has struck a chord with women in Hollywood and beyond. But there's still more work to be done.

Gadot has been vocal about her passion for the cause and has brought an awareness to topics that many of her star-fans have failed to grasp. "Women are still thinking that when we step up,

they will do something for us," said Gadot during an interview on Oprah last year. But what exactly is being done to address the issue of sexual harassment and sexual violence, and how bad is it? "People don't realize the situation," she adds. "They are just starting to see. People are starting to change." And, even though the men in the industry are starting to change, progress has been slow. And the

question is, why? "What can women do to drive change in a really significant way?" asks Gadot. Well, women in the industry can take a stand and be part of the change by sharing their experiences and speaking out. 6d1f23a050
