Solved: How to download and install 32-bit version on 64-bit version of Windows 10? - 9483275. How can I make the system support 64 bits when I don't? I want to run a program which is written in C++ which uses .NET functions (DLL) and has a 32 bit version which I want to deploy on a 64 bit system. I want to make sure my program works. What to do? UPDATE: I got this answer which might work. I haven't tested yet, but I hope it will. Thanks for the replies and for your input. Note. I'm still working with the 32-bit version dd2bc28256
