Ist of all, I think Notepad++ might be an easy tool to use, so I would really appreciate if you could tell me how I can change the Read/Write capabilities of the file back to the way they were before I (unsuccessfully) tried to make the file save-as-read-only. I've got these settings, and I'm not sure how to get back to the old ones: 'Use ANSI' - to 'Emulate selected ANSI code page' 'Use ANSI C (in HTML files only)' - to 'Emulate ANSI C (in HTML files only)' 'Use ANSI code page 1252 (Mac) for Western European' - to 'Use UTF-8' 'Use ANSI code page 1252 (UNIX) for Western European' - to 'Use UTF-8' 'Encoding' - to 'Encoding for file and for all windows' 'MarkANSIEncoding' - to 'Mark ANSIEncoding' I tried to apply the settings again, but I still can't get the Read/Write capabilities back. I keep getting an error when I'm saving as UTF-8. I'm using Notepad++ 6.6.8 with Windows 10. I've also tried to apply the formatting settings, and I keep getting the error: "A file with the same name already exists. Do you want to replace it?". Edit: Updated to Notepad++ 8.1.2, still not working. Edit 2: Just installed a new Notepad++ version 9.0.2.2, and I'm getting the same error again. So, this is the problem I'm running into in this issue: I'm using Windows 10, updated to the April 2018 update. So, Windows can read/write to the file. I changed the encoding to UTF-8, just in case. I'm using Notepad++ 8.0.3.2. <https://coub.com/stories/2685651-leadertelugumovie720pdownload12-leadertelugumovie720pdownload12>. Free download highlights.
