Virtualization Solution. Q: How
can I make Lightning stop the
error dialog from being shown?
As soon as the Lightning app
updates itself in the Lightning
Demos app, the update fails
and the update process
displays the error dialog. Since
we have hundreds of thousands
of users of the app, it always
takes them several minutes to
get back to our website to
cancel the update. How can we
stop the error dialog from
being shown if the update

fails? A: In the feedback tab of any Lightning App object, select the "Isolation mechanism" checkbox and hit "Save" (under "View"). This disables the destructive update process, giving the users another chance to cancel the update.

Role of the endothelium in modulating the contractile properties of the vascular smooth muscle of the rat aorta. The aim of this study was to investigate the role of the endothelium in regulating the contractile properties of

the rat aorta. The vascular and biochemical properties of aortae isolated from male Sprague-Dawley rats were compared after endothelial denudation or after mechanical removal of the endothelium. The endothelial-denuded aortae were found to have a significantly higher contractile response to endothelin-1 (ET-1) ($EC_{50} = 0.29 \pm 0.05$ nM) and KCl (12 mM) ($EC_{50} = 1.75 \pm 0.22$ mM) than the endothelium-intact aortae. Endothelium-denuded aortae

also exhibited a significantly reduced sensitivity to 12 mM KCl. In addition, desensitization to KCl was produced in an endothelium-intact aortic ring by 10 min of pretreatment with 12 mM KCl. These results suggest that the vascular endothelium exerts a modulatory role in the contractile response of the rat aorta.
