What's New in the Anti-SPAM Guard?

□ Anti-SPAM Guard for Windows is a perfect solution for fighting spam. □ Anti-SPAM Guard will check mail on the fly, when you receive it, thus reducing the rate of spam / phishing messages. □ The maximum number of opened messages is limited to 20. □ The maximum number of saved messages is unlimited. □ You can choose between different ways of checking mail: "by the hour", "on the basis of frequency of messages", "on the basis of date". □ You can save the status of the mail in two forms: □ - as simple string, which is displayed in a mail notification; □ - as a mail notification itself. □ Anti-SPAM Guard for Windows will not produce any false positives or negatives. □ During operation, Anti-SPAM Guard does not use any of your resources - it does not use CPU or memory. □ Anti-SPAM Guard has a built-in scanner and spam filter - it can automatically detect and remove spam / phishing messages. □ Anti-SPAM Guard requires a Windows XP SP2/SP3 license (or earlier) as well as Microsoft.NET Framework 1.1. □ Anti-SPAM Guard for Windows requires a Java Runtime Environment 1.5.2 (or earlier) or a Java Development Kit, please download it from here. Anti-SPAM Guard for Windows is a powerful anti-spam program that blocks spam messages and collects data about your e-mails. You can use it to find and delete suspicious messages that appear to be from known and trusted senders. Anti-SPAM Guard is easy to set up and will operate in the background while you are using your mail program. It is a perfect solution to fight spam, because Anti-SPAM Guard does not require any configuration and what information about suspicious messages Anti-SPAM Guard will provide. The program is fully customizable and can be used to help you catch spam, protect your e-mail accounts and track spam attempts to get past your firewall. Anti-SPAM Guard for Windows works with almost any Windows mail client, as well as with non-Microsoft mail programs. Anti-SPAM Guard does not require any configuration and supports any additional anti-spam modules that you might
