Most of you already know Transparent Window Manager. I'm just try to write a small how-to guide for Transparent Window Manager: how to add, remove, change transparency of any window. And one more use - to show any window in system tray. Transparent Window Manager Installation: Download file from our website ( unzip it (Extract), move unzipped files to folder with your application. The system will search files in: "%windir%\system32". After that, you may open Properties of Transparent Window Manager. Go to "Settings" tab and assign a value to Transparency Keys. That's it. Transparent Window Manager Properties: Transparency: to change transparency of any window go to Settings -> Window Transparency. Set opacity to 100%, 100% or 50%. We have already added this parameter to Transparent Window Manager in version 5.1. Select an object (Window, Dock, Titlebar, Fullscreen) -> Properties -> Window Transparency. Size of Background Window: to change size of background window, go to Settings -> Background Window Size. Set height to 100% and width to 100% or whatever. Transparent Window Manager System Tray: Right click on systray icon of Transparent Window Manager. Select "Show in System Tray" (or enable this option in Windows System Tray menu). After that, close any program you had running. To get rid of this window again, you may double click on icon in systray or click on "Hide from Tray" button. Transparent Window Manager System Tray icon: You may have another question "Why I have Transparent Window Manager icon in my tray?" Because Transparent Window Manager is not an application. It's a virtual desktop. So you may have it without program. How to change Transparency of Any Window: Go to "Settings" tab of Transparent Window Manager and assign a value to Transparency Keys. Then, double click on any window. Transparent Window Manager will change opacity and transparency of any window, as you like. Transparent Window Manager Permissions: Transparent Window Manager may be use only in interactive mode (active window). Transparent Window Manager also may be use for special mission systems (such as Xen, virtual machine, etc.) because may be required to run without user's control. Windows Vista, Windows 7: Because Transparent Window Manager changes settings of all
