**Shadowzilla**  
Description: Shadowzilla is a program which is very useful for

everyone and ensures that your system is as secure as possible. Shadowzilla is easy to use and simple to use. I have been using Home Edition Personal Edition for years. I like its simplicity, reliability, and that it is very easy to use. However, I wanted to use it on a larger computer. Enter Windows Home Server. I purchased a case from Seagate that fits perfectly into my existing Dell desktop with Windows XP Home Edition. Seagate gave me a copy of Windows Home Server along with the case and a couple of Network Attached Storage drives (I have two of them in my case). It was as simple as downloading the necessary files to upgrade my existing installation of Home Edition to a Home Server installation. I had a wonderful Vista machine with an external DVD drive. I simply connected my Windows Home Server to the DVD drive, and it installed fine. I had no problems with the upgrade. Once I have Windows Home Server on my network, I can access the files of the other computers from my media center (Windows Media Center Edition). This is not true with the standard Windows XP Personal Edition installation. I am using Windows Home Server as a part time file server. My first network attached storage device 2edc1e01e8
